

DryEars®

For Drying Water and
Moisture in the Ear Canal

The Ideal Remedy for Removing Water Trapped in the Ear Canal (Prevention of Swimmer's Ear).

DryEars® is an ear-water removal and drying aid designed for use after water-related activities such as:

- Swimming and Diving
- Sea/pool bathing
- Bathing/showering

DryEars® assists in:

- Relieving ear discomfort associated with water trapped in the ear canal.
- Preventing harmful effects such as bacteria or fungal infections and pain.

DryEars® combines a unique formula in a micro-spray mechanism device, preventing the commonly known Swimmer's Ear.

Directions

After water activity, spray 1-2 puffs in affected ear. Full evaporation of water and moisture trapped in the external ear canal occurs within 2-3 minutes after spraying.

Advantages

- Easy to use
- Optimal dispersion
- Safe & Effective
- Clinically tested
