

Dry Ears

The ideal remedy for removing water trapped in the ear canal Prevention of Otitis Externa (Swimmer's ear)

Dry Ears is an ear-water removal and drying aid designer for use after water – related activities such as: Sea or swimming pool bathing and showering.

Dry Ears assists in:

- Relieving ear discomfort associated with water trapped in the ear canal.
- Preventing harmful effects such as bacteria or fungal infections and pain.

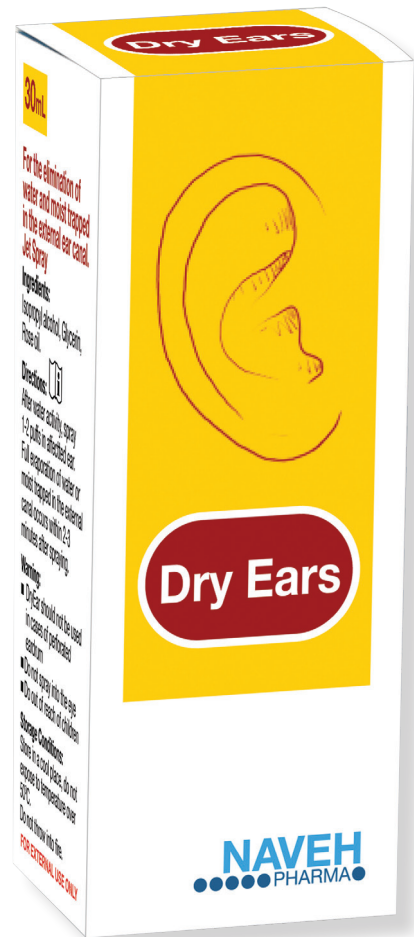

Dry Ears combines unique formulation in micro-spray mechanism device, preventing the commonly known Swimmer's Ear.

Directions:

After water activity, spray 1-2 puffs in affected ear.
Full evaporation of water and moisture trapped in the external ear canal occurs within 1-2 minutes after spraying.

Advantages:

- User Friendly
- Optimal dispersion
- Safe and Effective
- Clinically tested
- Preservative Free
- Pleasant Fresh Odor
